-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

3. Claims 11-20 are objected to because of the following informalities: Claims use language, such as “especially”, “and/or”, “preferably”, “at least sectionally”, “during operation”, “essentially”, etc. such terms should be avoided for the proper and clear understanding of the claim language. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. Claim 17 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 17 recites the limitation "said at least two leaf springs" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Endo et al. (5,691,485) (hereinafter Endo).

Endo teaches a Coriolis type flow measuring device including all the features of the instant invention including at least one measuring tube (4) having a first and second tube segment at the upstream and downstream ends, respectively, a support element (1) for holding the measuring tube having a first and second end pieces each containing a passageway. A leaf spring (12a1, 12a2, 12b1, 12b2) placed in the passageway between the measuring tube and the support element at the first and second tube segment.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Endo. Endo teaches all the features of the instant invention except for the specific shape and clamping apparatus. It would be within the scope of a skilled individual to use any shape of the leaf spring in order to be accommodated within the space provided between the two structures of the pipe. Moreover, one having ordinary skill in the art would obviously provide a locking structure in order to lock the leaf spring or the pipe from being accidentally removed from the housing structure.

Allowable Subject Matter

10. Claims 12-17 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. The following is a statement of reasons for the indication of allowable subject matter: The prior arts made available do not teach or fairly suggest, alone or in combination, do not teach the spring element embodied as a spring packet composed of two or more leaf springs or a layer of vibration-damping plastic provided between two leaf springs.
